

# FY21 TARGETS AND THREE-YEAR GOALS

As part of our contribution to the ‘decade of action’, this year we have set new longer-term, intersecting goals and targets that contribute to our focus areas and concentrate our resources on projects and programs that reduce carbon emissions, protect biodiversity, and invest in women and children as agents of sustainable development.

| Topic                                     | FY21 Target  | Three-year goal  | Related SDGs  |
|---|--|--|---|
| <b>Reducing carbon emissions</b>          | <b>20,000</b> people with improved access to low carbon products, services, and initiatives.   | Improve access to affordable, renewable energy products and services, particularly in developing countries, and facilitate behavior change to reduce all GHG emissions |       |
| <b>Protecting the natural environment</b> | <b>10,000</b> trees planted<br><b>5,000</b> hectares of forest (and other natural habitat) protected or restored<br><b>100%</b> of ERM Business Units participating in International Coastal Clean-up events | Reduce and reverse the degradation of natural habitats, particularly forests and other carbon sinks, including soil and oceans.  |       |
| <b>Women's livelihoods</b>                | <b>1,000</b> women's livelihoods created, supported or improved in the 'green' economy   | Ensure women's full and effective participation and equal opportunities for leadership at all levels of public life.   |       |
| <b>Environmental education</b>            | <b>10,000</b> women, children and young adults participating in environmental education programs, particularly in developing countries   | Improve education, awareness-raising and human and institutional capacity on climate change and biodiversity, particularly among young learners.                       |      |
| <b>Access to water and sanitation</b>     | <b>10,000</b> people with improved access to clean water and sanitation, including menstrual health and hygiene education  | Improve the sustainable management of, and access to, water and sanitation in developing countries.  |      |
