Dear Stakeholders

This letter serves to inform you that the scope of Eni and Sasol's exploration drilling project in ER236 is being reconsidered and it will be necessary to amend the current Draft Scoping Report.

As such, based on the current NEMA EIA regulations and associated timelines, Eni have decided to re-release the Draft Scoping Report and re-submit the application form in early 2018. **The public meetings scheduled for the 13th and 14th November in Richards Bay and Durban will therefore be postponed until January/February 2018** and a revised Draft Scoping Report will be released to the public and advertised prior to the meetings. It will be ensured that stakeholders are given the optimal time allowed for by legislation to comment and participate in the process.

Please note that all comments submitted during the initial notification period will still be included in the Comments and Responses Report. Once the revised scope is made available, comments already submitted may be also revised; withdrawn or replaced entirely. All stakeholders who have registered will remain on the stakeholder database.

We apologise for any potential inconvenience caused. We look forward to engaging with you further during 2018.

Yours sincerely

Lindsey

Dear Stakeholder,

RE: Environmental Impact Assessment for Exploration Drilling within Block ER236, off the East Coast of South Africa

Eni South Africa BV (Eni), and Sasol Africa Limited (Sasol) hold an Exploration Right 12/3/236 (ER 236) off the East Coast of South Africa. Eni has the operatorship of Block ER 236. Eni and Sasol are considering the possibility of conducting an exploration drilling programme in Block ER 236 to assess the commercial viability of the hydrocarbon reservoir for future development.

The project requires Environmental Authorisation (EA) from the National Department of Mineral Resources (DMR) under the National Environmental Management Act (NEMA) (Act No. 107 of 1998), as amended, through an Environmental Impact Assessment (EIA) process.

ERM released a Draft Scoping Report on 26 October 2017, which was subsequently withdrawn on 07 November 2017, as Eni and Sasol wished to reconsider the scope of the project.

Notice is hereby given that the revised Draft Scoping Report is available for comment. Changes made to the Draft Scoping Report are largely in the Project Description, Chapter 4, as the ER236 holders are now considering drilling up to six wells, instead of the four wells which were planned in the previous 2017 Draft Scoping Report. Key edits to the project scope have been underlined in the text of the Draft Scoping Report, other edits are outlined below.

All	<ul style="list-style-type: none"> Updated maps to reflect southern area of interest. Minor editorial edits.
Chapter 1 (Introduction)	<ul style="list-style-type: none"> Inclusion of southern area of interest in <i>Section 1.1</i>
Chapter 4 (Project Description)	<ul style="list-style-type: none"> Section 4.1 and Section 4.2 edited to include the southern area of interest
Chapter 5 (Baseline)	<ul style="list-style-type: none"> Updates made throughout to reflect the addition of the southern area of interest
Chapter 6 (EIA Process)	<ul style="list-style-type: none"> Public consultation details edited to reflect re-release of Draft Scoping Report
Chapter 8 (Plan of Study for EIA)	<ul style="list-style-type: none"> Provisional EIA schedule updated to reflect new timeframe

All comments received from stakeholders with regard to the previous Draft Scoping Report have been considered and included in the 2018 Draft Scoping Report, in the Comments and Responses Report (CRR) (*Annex C*). Stakeholders are encouraged to ensure that their comments are captured in the CRR and are welcome to submit further comment to ERM.

The comment period will have a duration of 30 calendar days from 22 January 2018 to 22 February 2018. The Report is available on the Project website: www.erm.com/eni-exploration-eia as well as on request, from ERM, and at the following public locations:

- Durban Central Lending Public Library
- Richards Bay Library
- Port Shepstone Library
- ERM offices, Suite S005, 17 The Boulevard, Westway Office Park, Westville

A Zulu or Afrikaans version of the executive summary can be made available on request.

Stakeholders are invited to attend one of the below listed public meetings where ERM will present more information about the project and the EIA. During the meeting the participants will also have the opportunity to ask questions to the Project team. Details of the public meetings are as follows:

Subject: Notification of Draft Scoping Report: EIA for Exploration Drilling within Offshore Block ER236, KZN, South Africa

ERM Ref: 0414229

Dear Stakeholder,

RE: Environmental Impact Assessment for Exploration Drilling within Block ER236, off the East Coast of South Africa

Eni South Africa BV (Eni), and Sasol Africa Limited (Sasol) hold an Exploration Right 12/3/236 (ER 236) off the East Coast of South Africa. Eni has the operatorship of Block ER 236. Eni and Sasol are considering the possibility of conducting an exploration drilling programme in Block ER 236 to assess the commercial viability of the hydrocarbon reservoir for future development.

The project requires Environmental Authorisation (EA) from the National Department of Mineral Resources (DMR) under the National Environmental Management Act (NEMA) (Act No. 107 of 1998), as amended, through an Environmental Impact Assessment (EIA) process.

ERM released a Draft Scoping Report on 26 October 2017, which was subsequently withdrawn on 07 November 2017, as Eni and Sasol wished to reconsider the scope of the project.

Notice is hereby given that the revised Draft Scoping Report is available for comment. Changes made to the Draft Scoping Report are largely in the Project Description, Chapter 4, as the ER236 holders are now considering drilling up to six wells, instead of the four wells which were planned in the previous 2017 Draft Scoping Report. Key edits to the project scope have been underlined in the text of the Draft Scoping Report, other edits are outlined below.

All	<ul style="list-style-type: none"> Updated maps to reflect southern area of interest. Minor editorial edits.
Chapter 1 (Introduction)	<ul style="list-style-type: none"> Inclusion of southern area of interest in <i>Section 1.1</i>
Chapter 4 (Project Description)	<ul style="list-style-type: none"> Section 4.1 and Section 4.2 edited to include the southern area of interest
Chapter 5 (Baseline)	<ul style="list-style-type: none"> Updates made throughout to reflect the addition of the southern area of interest
Chapter 6 (EIA Process)	<ul style="list-style-type: none"> Public consultation details edited to reflect re-release of Draft Scoping Report
Chapter 8 (Plan of Study for EIA)	<ul style="list-style-type: none"> Provisional EIA schedule updated to reflect new timeframe

All comments received from stakeholders with regard to the previous Draft Scoping Report have been considered and included in the 2018 Draft Scoping Report, in the Comments and Responses Report

(CRR) (*Annex C*). Stakeholders are encouraged to ensure that their comments are captured in the CRR and are welcome to submit further comment to ERM.

The comment period will have a duration of 30 calendar days from 22 January 2018 to 22 February 2018. The Report is available on the Project website: www.erm.com/eni-exploration-eia as well as on request, from ERM, and at the following public locations:

- Durban Central Lending Public Library
- Richards Bay Library
- Port Shepstone Library
- ERM offices, Suite S005, 17 The Boulevard, Westway Office Park, Westville

A Zulu or Afrikaans version of the executive summary can be made available on request.

Stakeholders are invited to attend one of the below listed public meetings where ERM will present more information about the project and the EIA. During the meeting the participants will also have the opportunity to ask questions to the Project team. Details of the public meetings are as follows:

VW wants to build SUV in Kenya
A press statement released by the president of Kenya suggests that Volkswagen is 'exploring' the possibility of producing a small SUV in the African country.
The German automaker set up a plant in the city of Thika near Nairobi in 2016, initially importing Polo Vivo kits from the Uitenhage factory in SA on either a semi-knocked down or completely knocked down basis.
However, the statement from the office of President Uhuru Kenyatta said that not only was VW now 'looking to double production' in the country, it was also keen to 'introduce a new model at its plant'.
The statement said that VW SA boss, Thomas Schaefer, told President Kenyatta at a recent meeting in East London that the firm was 'exploring producing a second model in Kenya' in the form of a small SUV, while also doubling production of the Polo Vivo.

PART 1: Project Overview

Project Background and Motivation

- At a strategic level the South African government promotes the sustainable exploration and development of oil and gas reserves, for example through Operation Phakisa which includes offshore oil and gas as a focus area.
- Improvements in exploration technology and the need for South Africa to diversify its energy mix has resulted in increased interest in exploration activity off South Africa's coast

Project Context

- Eni South Africa BV (Eni), and Sasol Africa Limited (Sasol) hold an Exploration Right off the East Coast of South Africa Block ER236 (12/3/236)
- Eni and Sasol are considering conducting an exploration drilling programme in Block ER236 to determine the presence of hydrocarbons
- Eni is considering drilling up to 6 deep water wells within the Block ER236:
 - 4 wells within a northern area of interest
 - 2 wells within a southern area of interest
- The success of the first well in each area will determine whether or not subsequent wells are drilled
- Exploration drilling will investigate the subsea geological structures to determine the presence of naturally occurring hydrocarbons: oil and/or gas

Project Description: Main Project Components

- Offshore exploration well
- Deep water drillship
- Exclusion Zone around drillship
- Onshore logistics base (Richards Bay or Durban)
- Supply vessels, stand-by vessels and helicopters

Project Phases

Project activities include the following phases:

- Mobilisation
- Drilling
- Well plugging and abandonment
- Demobilisation

All activities conducted will comply with South Africa legislation requirements, industry standards, and international good practice

Mobilisation

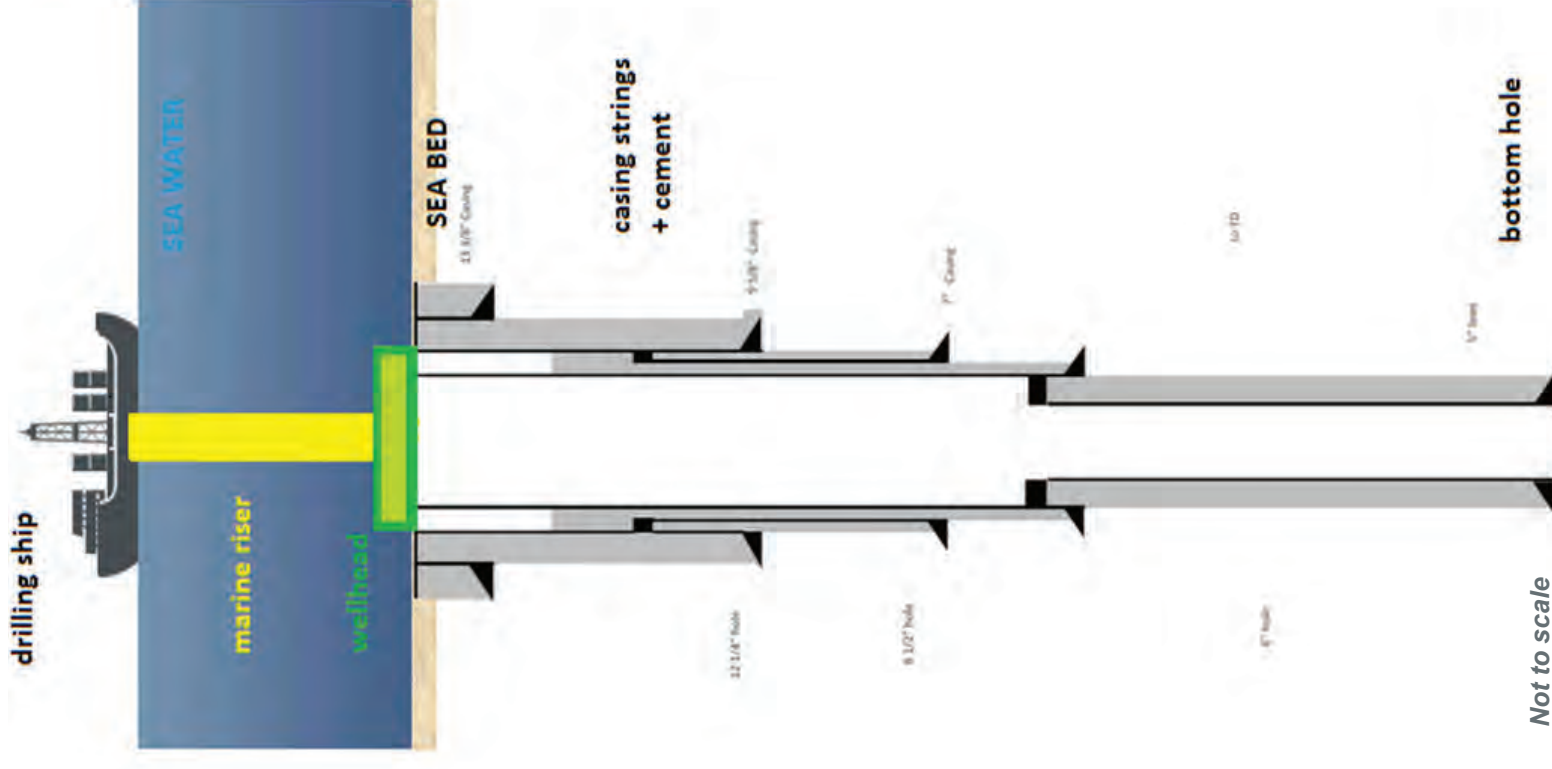

- The drillship will arrive directly on location
- Pre-drilling activities includes:
 - Seabed survey with Remote Operated Vehicle (ROV)
 - Positioning of well
 - Beacon placement
 - Dynamic positioning trials
- Navigation equipment (dynamic positioning, GPS and beacons) will keep the ship stable above the well location through all over operations

Source: Shutterstock

Drilling

- Different drilling bits sizes are used to drill a series of telescoping holes, from the seabed to the total depth of the planned well
- Each hole is cased in a steel tube which is cemented in place to secure/seal the hole
- A blowout preventer (BOP) will be present at wellhead during drilling to prevent an uncontrolled release of hydrocarbons to surface/seabed
- The drilling activity proposed vertical well to a total depth of:
 - Northern Area: Approx 3,800 m - 4,100 m below the sea surface
 - Southern Area: Approx 5,450 m below the sea surface

Drilling

Well Logging

- Continuous testing is carried out on the drill cuttings transferred to the surface to obtain information on the presence of hydrocarbons

Well Completion and Testing

- Well completion and well testing operations will only be conducted on the appraisal well if hydrocarbons are found

Source: Shutterstock

Source: Shutterstock

Well Plugging and Abandonment, and Demobilisation

Well Plugging and Abandonment

- The well is plugged by setting cement plugs inside the wellbore
- Plugs are tested for integrity to prevent leaks
- The blowout preventer will be then retrieved to surface

Demobilisation

- Final Remote Operated Vehicle survey will be performed at seabed
- The drillship and support vessels leave the well location

Project Alternatives

Site Locality Alternative

- Well location
- Onshore Logistics Base
 - Durban
 - Richards Bay

Design or Layout Alternatives

- Number of wells
- Time schedule

No-Go Option

To be considered in the EIA in accordance with the requirements of the EIA Regulations, 2014

Technology Alternative

- Drilling MODU alternatives
- Drilling fluids
- Drill cuttings disposal method
 - Offshore treatment and discharge to sea
 - Offshore pre-treatment and onshore disposal

PART 2: EIA Process Summary

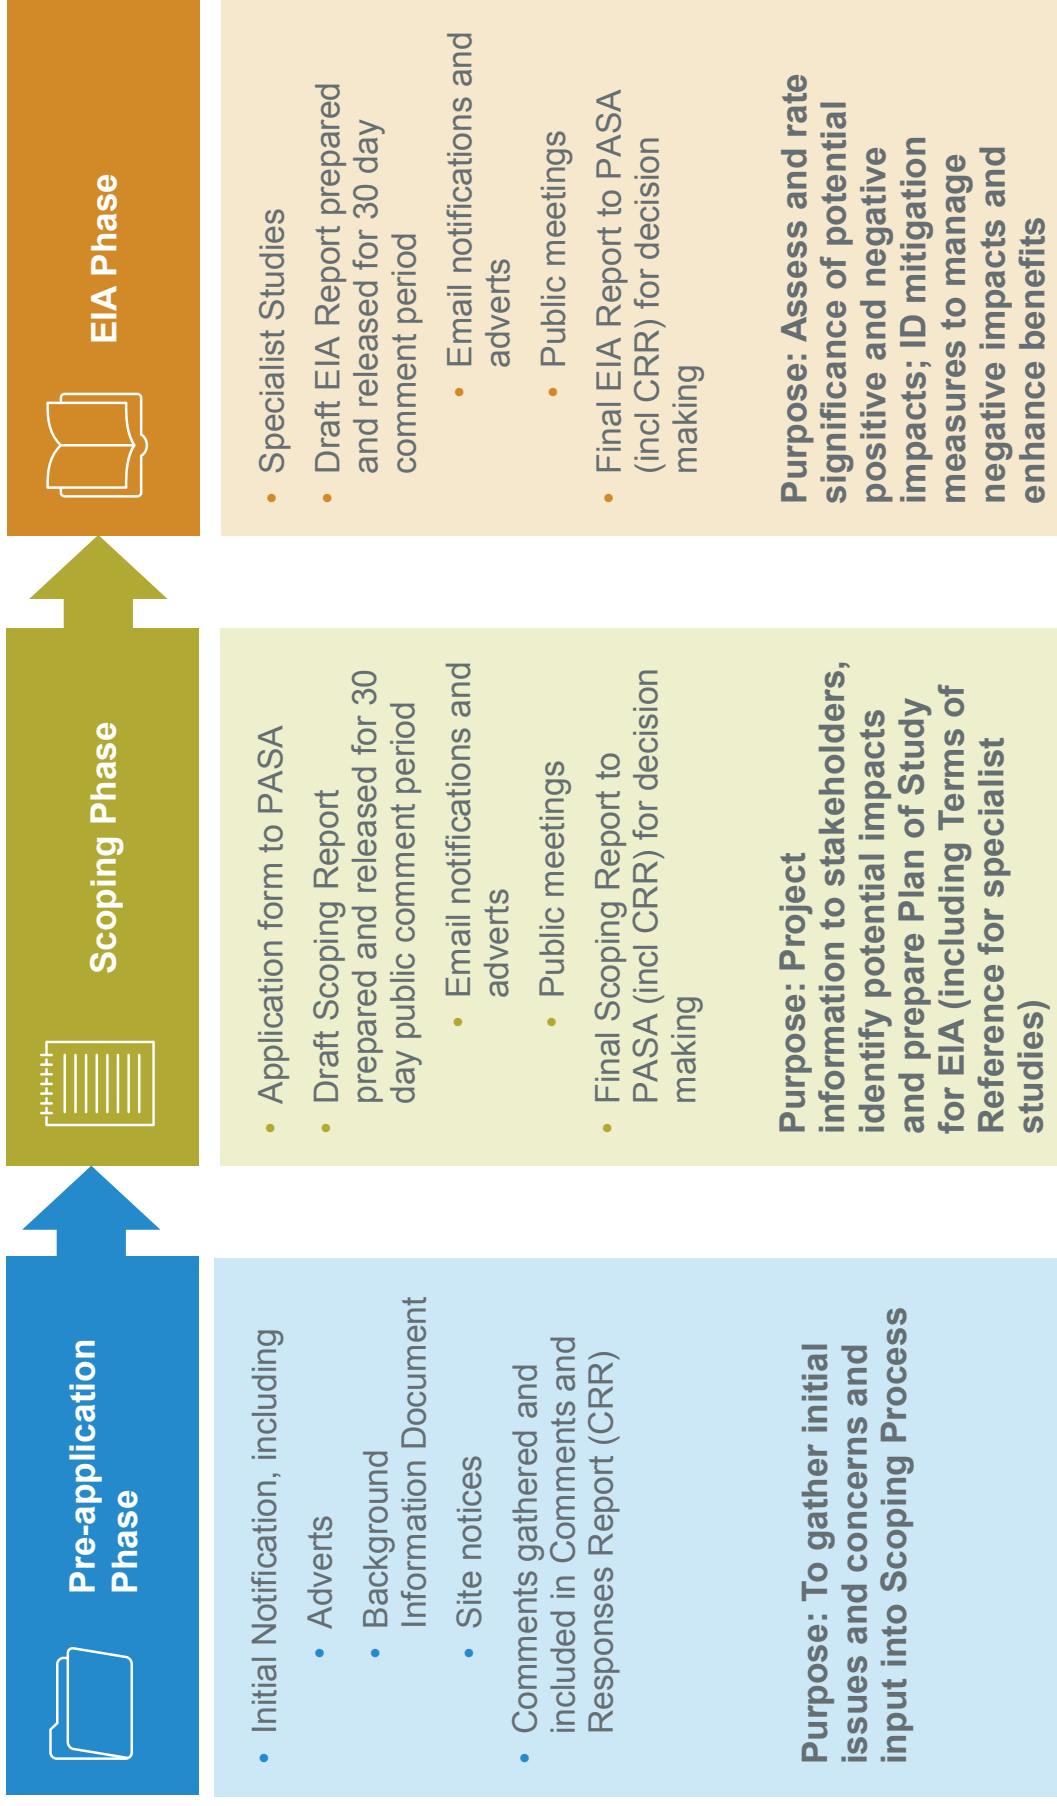

Why is an EIA required?

Full Scoping and EIA Processes in terms of:

- National Environmental Management Act, 1998, (Act No. 107 of 1998), as amended (NEMA)
- EIA Regulations (GNR 982) Listing Notice 1 (GNR 983), Notice 2 (GNR 984) and Notice 3 (GNR 985), as amended by Government Notices 324, 325, 326 and 327 in April 2017
